

GALLANT
EXPLORATION
& MITIGATION

Capability Statement

Gallant Exploration and Mitigation, LLC

Core competencies

Settling ponds and water management. Settling ponds, diversions and recirculation systems.

Sediment and erosion control. Silt fencing, check dams, slope stabilization and runoff control.

Mine closure and reclamation. Portal and shaft closures, demolition, recontouring and revegetation.

Exploration site work. Access roads, drill pads, trenching and bulk-sample pits.

Compliance support. Pre-inspection walk-throughs, pond maintenance and cleanout.

Key personnel

John Viera Gallant, President

John has twenty-five years of experience in commercial construction. He joined H&G Structures, a general contracting firm, as a superintendent in 1999, advanced to project manager, and became a co-owner, remaining with the firm until 2024. At its peak, H&G completed \$30 million in work annually across 33 states, including big-box retail remodels, polycarbonate canopies, restaurants, adult living facilities, site work and drainage, and golf club renovations and drainage ponds.

Florida Certified General Contractor CGC1535049. BS, University of Florida. MS, Florida International University. U.S. Marine Corps, 1994–1997.

Differentiators

Service-disabled veteran-owned small business.

Twenty-five years of construction management across 33 states.

Full-store retail remodels delivered to fixed opening dates, averaging under sixteen weeks.
